

Clark Forklift Attachment

Clark Forklift Attachments - Performing globally, there are at this time 350,000 Clark forklifts and lift trucks in operation, with more than 250,000 of those in commission in North America. Clark has five main lines of forklifts across the globe, making it one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, covers more than 120,000 specialized components designed for 20 distinctive models of lift trucks and automated equipment. Your local Clark Dealer is your complete source for availability of all your components needs offered by Clark Totalift.

Clark features a exceptional Parts Supply team. The components warehouses are conveniently positioned in Changwon, South Korea and Louisville, Kentucky to ensure exceptional service to both their buyers and their dealers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Motivated to provide the highest level of value and service to our clients, Clark remains on the leading edge when it comes to enhancing efficiency and benefiting performance.

Internationally, Clark has one of the most outstanding dealer support networks. With over 550 locations globally, supplier representation in over 80 countries and 230 locations in North America, their high level of dedication to their consumers predominates the materials handling market.

By revolutionizing the operator restraint system protection feature, Clark proudly remains a leader of refinement in the industrial equipment and automated lift truck industry. This exceptional dedication to safety is at this time a customary feature on every lift truck.

Clark's recurrent effort to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first forklift maker across the globe to be certified with the globally accepted quality standard ISO 9001 for every one of their manufacturing plants. Also, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be prepared for any environmental restrictions, thus placing them in a dominant market position.

Clark has selected the structure of "Lean Production" at all of its assembly facilities because this system is extremely economical and enables minimal use of resources. Developed to guarantee maximum efficiency, this system is intended to discover and acknowledge the most efficient ways for manufacturing plant stewardship. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

By working together, Clark's product suppliers and engineers communicate towards improving product efficiency while minimizing expenses. The contemporary value engineering agenda combines modern product improvement and provides superior consumer support and service within the industry.
