Clark Totalift has a very impressive international support network. With over 550 locations globally, supplier representation in over 80 countries and 230 locations in North America, their high level of commitment to their consumers predominates the material handling industry.

By pioneering the operator restraint system safety feature, Clark proudly remains a leader of modernization in the industrial equipment and automated lift truck industry. This exceptional dedication to safety is now a customary feature on every lift truck.

Clark's recurrent mission to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first forklift producer across the globe to be certified with the internationally accepted quality standard ISO 9001 for each and every one of their manufacturing facilities. Furthermore, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be prepared for any environmental restrictions, thus placing them in a prevailing industry position.

Clark has chosen the system of "Lean Manufacturing" at all of its assembly plants for the reason that this method is particularly economical and permits minimal use of resources. Established to guarantee maximum efficiency, this system is designed to discover and acknowledge the most effective ways for production plant management. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

Clark's product engineers and suppliers communicate together to improve the proficiency and excellence of their merchandise while minimizing costs. The new value engineering agenda combines innovative product improvement and delivers improved client support and service within the industry.
