

## Utility Buckets

Utility Buckets - Universal Fit buckets likewise called "slip-on-the-forks" forklift attachment buckets. These buckets can be used along with whatever make and model of extendable reach lift truck. If your unit can't be matched with a quick-tach unit, another brand new or used universal fit bucket can be located in its place. Standard universal forklift buckets connect to blades which are up to six inches wide and are forty eight inches long. Larger fork pockets could be prearranged through an account executive upon request.

As they slip directly onto the forks, universal fit buckets stay on the machine and are much less susceptible to destruction. As opposed to the quick-tach bucket models, universal fit buckets are 50% deeper. This additional space makes them perfect for lifting irregular shaped loads such as elevating roof gravel, moving large debris piles, broken up concrete, backfilling behind walls and tearing off roof trash.

### Quick-Tach Buckets

Quick-Tach Buckets are constructed for extendable-reach lift trucks. They are designed to allow placement of materials far beyond the reach of a loader. A hardened beveled cutting blade on both sides and on the leading edge reinforces stability, resistance to wear and offers supreme durability. Quick-Tach forklift buckets are enhanced by scuff bars along the base of the unit which shield it from abrasion.

Quick-Tach lift truck buckets could be utilized to substitute the carriage and forks which weigh between one hundred to seven hundred pounds. When set up, these buckets free up more of the unit's cargo capacity, enabling it to handle heavier and bigger stuff. The Quick-Tach can pour objects approximately 1.5 feet higher because of the shorter depth of its bucket. These buckets are built in a customized fashion so as to meet the specs of certain models and makes of lifts. It is essential to consult a construction equipment specialist so as to find the modified Quick-Tach bucket solution for all your requirements.

Lift truck bucket attachments are great for construction work on the ground level. They could be used so as to transfer snow in the northern areas, gravel and even sand. Clean-up on the job location can be likewise be completed with a lift truck bucket. The numerous uses the bucket can accomplish saves the business more money and time in view of the fact that it does have to entirely switch tools or machines and this could help prevent running into overtime.
